PROJECTS:

Rural Banking Application:

The fintech companies can register on our website and select a subscription plan based on their requirements like how many customer records they need to store, how many employees will need access, etc. For simplicity, I will now be building the online web application with the one subscription plan, and the payment part is also excluded.

Gold Loan Management System:

It's a website developed using React and firebase which can add details of gold loans and can display the details using a unique loan Id. Interest calculation is also available.

INTERNSHIP

- ❖ In Microsoft Future Ready Talent Internship, I learned about the Azure cloud and its services and build a web application using Azure services.
